### 2. Quotations From Chairman Mao Tsetung (On Inside Front Cover)

The force at the core leading our cause for-  
ward is the Chinese Communist Party.

The theoretical basis guiding our thinking is  
Marxism-Leninism. 27 : 5

The Chinese Communist Party is the core of  
leadership of the whole Chinese people.  
Without this core, the cause of socialism can-  
not be victorious. 27 : 5

The Party organization should be composed of  
the advanced elements of the proletariat; it  
should be a vigorous vanguard organization  
capable of leading the proletariat and the  
revolutionary masses in the fight against the  
class enemy. 27 : 5

Every Party branch must reconsolidate itself  
in the midst of the masses. This must be  
done with the participation of the masses

and not merely a few Party members; it is  
necessary to have the masses outside the  
Party attend the meetings and give com-  
ments. 27 : 6

In the Great Proletarian Cultural Revolution,  
some tasks have not yet been fulfilled and  
they should now be carried on, for instance,  
the tasks of struggle-criticism-transforma-  
tion. 27 : 6

Without the efforts of the Chinese Communist  
Party, without the Chinese Communists as  
the mainstay of the Chinese people, China  
can never achieve independence and libera-  
tion, or industrialization and the moderniza-  
tion of her agriculture. 28 : 2

Armed with Marxist-Leninist theory and ideo-  
logy, the Communist Party of China has  
brought a new style of work to the Chinese  
people, a style of work which essentially  
entails integrating theory with practice,  
forging close links with the masses and  
practising self-criticism. 28 : 2

People of the whole world, unite still more  
closely and launch a sustained and vigorous  
offensive against our common enemy, U.S.  
imperialism, and against its accomplices! It  
can be said with certainty that the complete  
collapse of colonialism, imperialism and all  
systems of exploitation, and the complete  
emancipation of all the oppressed peoples and  
nations of the world are not far off. 28 : 2

Unite to win still greater victories. 29 : 2  
42 : 2

The enemy rots with every passing day, while  
for us things are getting better daily. 29 : 2  
46 : 2

It is man's social being that determines his  
thinking. Once the correct ideas characteris-  
tic of the advanced class are grasped by the  
masses, these ideas turn into a material force  
which changes society and changes the world. 29 : 2  
42 : 2

They [die-hard] always get the opposite of what they want. They invariably start by doing others harm but end by ruining themselves.	29 : 2	I am for the slogan "fear neither hardship nor death."	32 : 3 33 : 2 35 : 2
Political work is the life-blood of all economic work.	30 : 2 44 : 2	Work meticulously. Meticulous care is necessary; to be careless will not do for that often leads to errors.	32 : 3
People say the Yangtze is a very big river, but actually, bigness is nothing to be afraid of. Isn't U.S. imperialism very big? But there wasn't much to U.S. imperialism once we stood up to it. So there are big things in the world which are actually not to be feared.	30 : 2	The raging tide of the people of the world against the U.S. aggressors is irresistible. Their struggle against U.S. imperialism and its lackeys will assuredly win still greater victories.	33 : 2 43 : 2 47 : 2
Working hand in glove, Soviet revisionism and U.S. imperialism have done so many foul and evil things that the revolutionary people the world over will not let them go unpunished. The people of all countries are rising. A new historical period of struggle against U.S. imperialism and Soviet revisionism has begun.	30 : 2 33 : 2 34 : 2 51-52 : 2	The Chinese people regard victory in the anti-imperialist struggle of the people of Asia, Africa and Latin America as their own victory and give warm sympathy and support to all their anti-imperialist and anti-colonialist struggles.	34 : 2
The working class must exercise leadership in everything.	31 : 2	We will not attack unless we are attacked; if we are attacked, we will certainly counter-attack.	34 : 2
The proletariat must exercise all-round dictatorship over the bourgeoisie in the realm of the superstructure, including the various spheres of culture.	31 : 2	One of our current important tasks on the ideological front is to unfold criticism of revisionism.	35 : 2 36 : 2 44 : 2 50 : 2
To accomplish the proletarian revolution in education, it is essential to have working class leadership; the masses of workers must take part in this revolution and, in cooperation with Liberation Army fighters, form a revolutionary three-in-one combination with the activists among the students, teachers and workers in schools and colleges, who are determined to carry the proletarian revolution in education through to the end. The workers' propaganda teams should stay permanently in the schools and colleges, take part in all the tasks of struggle-criticism-transformation there and will always lead these institutions.	31 : 2	Make trouble, fail, make trouble again, fail again . . . till their doom; that is the logic of the imperialists and all reactionaries the world over in dealing with the people's cause, and they will never go against this logic. This is a Marxist law.	35 : 2 44 : 2
This army is powerful because all its members have a conscious discipline; they have come together and they fight not for the private interests of a few individuals or a narrow clique, but for the interests of the broad masses and of the whole nation. The sole purpose of this army is to stand firmly with the Chinese people and to serve them wholeheartedly.	32 : 3	By persevering in protracted war the Vietnamese people will surely drive the U.S. aggressors out of their country.	36 : 2
		Marxism can develop only through struggle, and not only is this true of the past and the present, it is necessarily true of the future as well.	36 : 2
		Going all out, aiming high and achieving greater, faster, better and more economical results in building socialism.	38 : 2
		With regard to the question of world war, there are but two possibilities: One is that the war will give rise to revolution and the other is that revolution will prevent the war.	38 : 2
		Socialist society covers a considerably long historical period. In the historical period of socialism, there are still classes, class con-	

traditions and class struggle, there is the struggle between the socialist road and the capitalist road, and there is the danger of capitalist restoration. We must recognize the protracted and complex nature of this struggle. We must heighten our vigilance. We must conduct socialist education. We must correctly understand and handle class contradictions and class struggle, distinguish the contradictions between ourselves and the enemy from those among the people and handle them correctly. Otherwise a socialist country like ours will turn into its opposite and degenerate, and a capitalist restoration will take place. From now on we must remind ourselves of this every year, every month and every day so that we can retain a rather sober understanding of this problem and have a Marxist-Leninist line. 39 : 2

The Great Proletarian Cultural Revolution is a powerful motive force for the development of the social productive forces in our country. 39 : 2

We the Chinese nation have the spirit to fight the enemy to the last drop of our blood, the determination to recover our lost territory by our own efforts, and the ability to stand on our own feet in the family of nations. 39 : 2  
43 : 2

The Chinese people will see that, once China's destiny is in the hands of the people, China, like the sun rising in the east, will illuminate every corner of the land with a brilliant flame, swiftly clean up the mire left by the reactionary government, heal the wounds of war and build a new, powerful and prosperous people's republic worthy of the name. 41 : 2

The truth of Marxism-Leninism is on our side. So is the international proletariat. So are the oppressed nations and oppressed peoples. And so are the masses of people who constitute over 90 per cent of the world's population. We have friends all over the world. 41 : 2  
47 : 2

Just because we have won victory, we must never relax our vigilance against the frenzied plots for revenge by the imperialists and their running dogs. Whoever relaxes vigilance will disarm himself politically and land himself in a passive position. 41 : 2

The epoch we are living in is an epoch in which the imperialist system is heading for

total collapse, the imperialists have fallen inextricably into crisis. . . . 42 : 2

The 700 million Chinese people are powerful backing of the Vietnamese people; the vast expanse of China's territory is their reliable rear area. 43 : 2  
51-52 : 2

Revolution means liberating the productive forces and promoting their growth. 43 : 2

Politics is the commander, the soul in everything. 44 : 2

Class contradiction, the class struggle between the proletariat and the bourgeoisie and the struggle between the socialist road and the capitalist road exist throughout the transitional period. We shall go astray if we forget this fundamental theory and practice of our Party over the last dozen years or so. 45 : 2

All reactionary forces on the verge of extinction invariably conduct desperate struggles. They are bound to resort to military adventure and political deception in all their forms in order to save themselves from extinction. 45 : 2

To lead means not only to decide general and specific policies but also to devise correct methods of work. Even with correct general and specific policies, troubles may still arise if methods of work are neglected. 46 : 2

By taking part in collective productive labour, the cadres maintain extensive, constant and close ties with the working people. This is a major measure of fundamental importance for a socialist system; it helps to overcome bureaucracy and to prevent revisionism and dogmatism. 46 : 2

Every Communist must grasp the truth, "Political power grows out of the barrel of a gun." 46 : 2

Liberate philosophy from the confines of the philosophers' lecture rooms and textbooks, and turn it into a sharp weapon in the hands of the masses. 47 : 2

Referring to the comrades from the basic levels who were newly elected to the Central Committee, Chairman Mao exhorted us during the Ninth National Congress of the Party to "see to it that they do not divorce themselves from the masses or productive labour and that they must perform their duties." 48 : 2

Going down to do manual labour gives vast numbers of cadres an excellent opportunity to study once again; this should be done by

all cadres except those who are old, weak, ill or disabled. Cadres at their posts should also go down in turn to do manual labour. 48 : 2

Let the Parties and peoples of China and Albania unite, let the Marxist-Leninists of all countries unite, let the revolutionary people of the whole world unite and overthrow imperialism, modern revisionism and the reactionaries of every country! A new world without imperialism, without capitalism and without any system of exploitation is certain to be built. 38 : 2  
48 : 2  
50 : 2

Revolutions and revolutionary wars are inevitable in class society, and without them it is impossible to accomplish any leap in social development and to overthrow the reactionary ruling classes and therefore impossible for the people to win political power. 48 : 2

The Parties and peoples of China and Albania have cemented a profound revolutionary friendship in socialist revolution and socialist construction and in the struggle against imperialism and modern revisionism. This friendship founded on the basis of Marxist-Leninist and proletarian internationalist principles is eternal and indestructible. 49 : 2

The revolutionary friendship between the peoples of China and Albania has stood the test of fierce international class struggles.

No matter what happens in the world, our two Parties and our two peoples will always be united, will always fight together and be victorious together. 49 : 2  
51-52 : 2

The time is not far off when all the aggressors in the world will be buried together with their running dogs. There is no escape for them. 49 : 2  
50 : 2

Break down foreign conventions and follow our own road in developing industry. 49 : 2

Weapons are an important factor in war, but not the decisive factor; it is people, not things, that are decisive. The contest of strength is not only a contest of military and economic power, but also a contest of human power and morale. Military and economic power is necessarily wielded by people. 50 : 2

All our literature and art are for the masses of the people, and in the first place for the workers, peasants and soldiers; they are created for the workers, peasants and soldiers and are for their use. 51-52 : 2

Ideological work and political work are the guarantee for accomplishing economic and technical work and serve the economic base. Ideology and politics are the commander, the soul in everything. Economic and technical work are bound to go wrong if we in the least slacken our ideological and political work. 51-52 : 2
